Arctic Cooler

EVAPORATIVE COOLERS

High temperatures in industries cause increased incidence of heat related illnesses, high absenteeism and lower productivity.

Adequate ventilation of an industrial building is a low-cost investment that enhances workman productivity and pays for itself in less than an year. Evaporative cooling is a suitable means of achieving comfort conditions in all kinds of industries, being less expensive to install and operate than air conditioning systems (approx. 1/10th of the air-conditioning cost).

DRI's cost effective **Arctic Evaporative Cooler** raises the productivity of occupants of the premises immediately. It helps to foster employee goodwill and cools tempers and grievances by reducing fatigue and increasing output.

The Arctic Advantages :

- ♦ Unique design incorporating rigid media Ecocool
- ♦ Evaporative Cooling Pads.
- ♦ High cooling efficiency.
- ♦ Lowers the fresh air temperature by 7-12°C.
- ♦ Compact & sturdy design for rooftop or side wall Installations.
- ♦ Light in weight.
- ♦ Easy to install and maintain.
- ♦ Very low running cost—Beat the Heat, Easily and Economically.
- ♦ Supplement/replace mechanical refrigeration in Industrial,
- ♦ Commercial, Institutional and Agricultural Applications.
- ♦ Full range available to address your requirements of Spot
- ♦ Cooling, Commercial Cooling and Industrial Cooling.

Evaporative Cooling Pads
